Konstantin Ivanov

SQA Engineer

SUMMARY

QA Engineer with full-stack testing experience across web, mobile, and backend systems — from UI/UX and API testing to performance, CI/CD pipelines, and on-site hardware integrations. Got experience in test automation with Python, Pytest, and Playwright, along with hands-on DevOps exposure across Kubernetes, Docker, Terraform, and observability stacks, enabling deeper debugging and closer collaboration with engineering teams. Experienced across diverse industries in both contractor and full-time roles, primarily within Agile environments.

EXPERIENCE

Bluebricks

Tel Aviv

QA Lead

Jan 2025 – Present

- Own CLI testing strategy and execution across the platform
- Drive front-end and back-end test coverage across the product
- Create and maintain test plans, test strategy, and QA reporting for stakeholders
- Investigate and troubleshoot infrastructure-level issues
- Configure and maintain Infrastructure as Code (IaC)
- Track and validate releases end-to-end

bluebricks.co

Blackbird Lab

Kyiv, Ukraine

QA Engineer

Jan 2022 – Jan 2025

- Tested a HoloLens2 AR application alongside its companion web application
- Owned release tracking and built/maintained the test suite
- Performed API testing across integrated services
- Conducted on-site testing embedded with the engineering team
- Validated BIM (Building Information Modeling) integrations

blackbird-lab.com

Togizu Technologies LTD

Kyiv, Ukraine

QA Engineer

Apr 2020 – Jan 2022

- Performed front-end and API testing across releases
- Maintained release tracking and QA documentation
- Documented product testing outcomes and processes
- Operated Docker/Kubernetes environments for test deployments
- Maintained and validated beta environment deployments
- Verified database consistency and third-party service integrations

TravelBank

San Francisco

QA Engineer

Jan 2018 – Mar 2020

- Owned QA procedures across Web, Mobile, and API platforms
- Ensured overall product quality throughout release cycles
- Designed and developed test plans and test cases
- Performed initial debugging and root-cause triage
- Monitored product performance throughout testing cycles
- Tracked and documented defects using issue-tracking systems
- Reported test cycle results to PMs, Dev Leads, and Head of QA
- Operated and maintained Jenkins CI/CD pipelines

Applause Inc.

Member, Applause Testing Services Team

United States
Aug 2017 – Nov 2019

- Gathered SRS requirements and reviewed acceptance criteria
- Participated in project planning and estimation sessions
- Performed manual testing on every pull request to validate changes
- Conducted positive, negative, and exploratory testing within PR reviews
- Documented issues found during feature sprint test cycles
- Ran full regression testing ahead of public feature releases
- Performed functional, smoke, acceptance, usability, GUI, compatibility, configuration, and beta testing across web, iOS, and Android
- Delivered test results and feedback to Product, QA Management, Developers, and Design
- Facilitated daily scrum calls with clients and internal QA teams
- Contributed to monthly team retrospectives
